2014 Fraud Update:

It Isn't Who You Think It Is... and It Isn't What You Think They're Doing

Presented for the Texas Association of County Auditors "On The Road Area Training" San Antonio, Texas July 18, 2014

Presented by Steve Dawson CPA, CFE DAWSON FORENSIC GROUP www.dawsonforensicgroup.com

Why Does Fraud Happen... So Much

Why Does Fraud Happen... So Much

Evil has not taken over our society...

FINANCIAL PRESSURE HAS!!!

FRAUD DISCOVERIES

An employee responsible for planning and reserving meeting rooms at local hotels for company meetings was able to embezzle more than \$190,000 from her company by utilizing the following method:

She would obtain a price quote (i.e. \$8,000) from a local hotel for an upcoming meeting claiming an anticipated attendance of approximately 200 people. The employee would then submit the faxed quote with her expense report, claiming that she had charged the \$8,000 on her personal credit card, and be reimbursed the cost. After the actual meeting took place, with only 100 participants, the actual, much lower bill (i.e. \$4,500) would arrive. She would then pay the bill with her personal credit card. The net personal profit from this one transaction amounted to \$3,500.

FRAUD DISCOVERIES

An employee embezzled funds from her company by increasing the tip amount on the customer's copy of restaurant credit card receipts by approximately \$2 to \$3 per meal. The actual restaurant copy of the receipt represented the actual lesser amount charged to the credit card. The employee would then attach the customer copy of the receipt to her expense report for reimbursement of charges to her personal credit card. The employee was caught when we noticed a \$4 tip written on a receipt for an \$8 purchase... for a book at a local book store.

THE FRAUD TRIANGLE

JOSEPH T. WELLS; OCCUPATIONAL FRAUD AND ABUSE; (OBSIDIAN PUBLISHING CO. - 1997); PG. 11

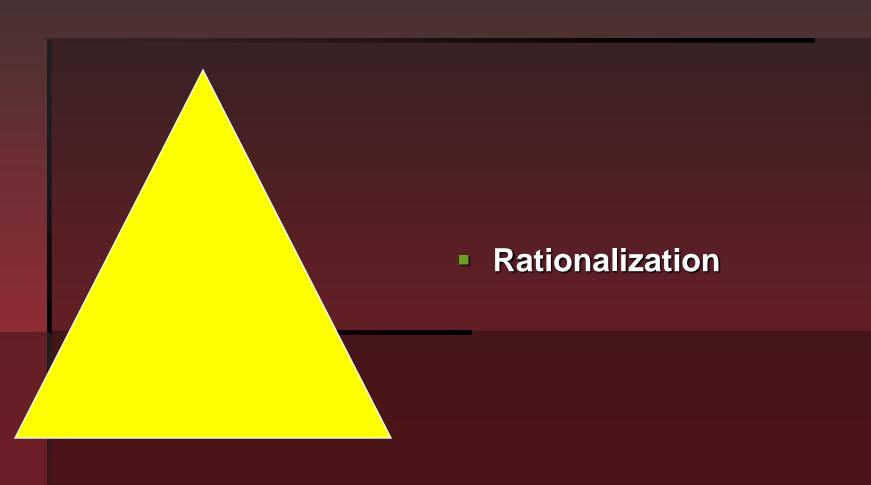

Incentive / Pressure

- A gambling or drug habit
- Personal debt or poor credit
- A significant financial loss or need
- Peer or family pressure to succeed

THE FRAUD TRIANGLE

JOSEPH T. WELLS; OCCUPATIONAL FRAUD AND ABUSE; (OBSIDIAN PUBLISHING CO. - 1997); PG. 11

Rationalization: "I'm not a bad person... really!"

"I was just borrowing the money... I was going to pay it back"

"The company won't even realize its gone; its not that much"

"I've been here 20 years; the company owes me"

"I deserve this after the way I've been treated"

"My boss does it all the time"

THE FRAUD TRIANGLE

JOSEPH T. WELLS; OCCUPATIONAL FRAUD AND ABUSE; (OBSIDIAN PUBLISHING CO. - 1997); PG. 11

Opportunity

- Poor Internal Controls
- Lack of Supervision
- Poor Accounting Records
- Extreme Trust in a Single Individual
- Lack of Disciplinary Action for Previous Frauds

THE FRAUD TRIANGLE

JOSEPH T. WELLS; OCCUPATIONAL FRAUD AND ABUSE; (OBSIDIAN PUBLISHING CO. - 1997); PG. 11

Types of Fraud

"Fraud and Stupid Look Exactly Alike"

Intent turns Stupid into Fraud

Misappropriation

Taking of company assets...

"I'll just borrow this for a little while"

Corruption

"You scratch my back, I'll scratch yours?

BRIBERY – To Influence

KICKBACKS

BID-RIGGING

ILLEGAL GRATUITIES – For or Because of

Fraudulent Statements

"Let's make this number this and that number that... it will look better"

REPORT TO THE NATIONS ON OCCUPATIONAL FRAUD AND ABUSE

Behavioral Red Flags

Living Beyond Means 43.8% Financial Difficulties 33.0%

<u>The Mind... A Powerful Enemy:</u> Behavioral Analysis

- Behaviorist Principles
- Fraud prevention relies on a thorough analysis of behavior
- Money exerts a powerful influence

Employment (the workplace) is a System of Behavior:

- For both the crook and the dedicated worker, money exerts a powerful influence
- So we must establish a positive set of relations between employees and funds flowing through the company

Punishment is the least effective method of changing behavior:

- A temporary suppression of the behavior, but only with constant supervision and application
- Applying a negative stimulus or taking away a positive one only altered behavior while being applied

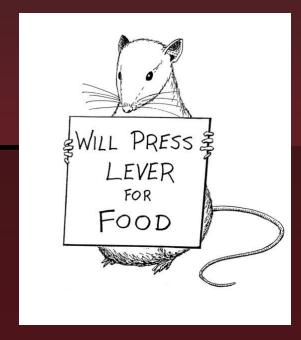

<u>Behavioral Analysis</u>

Reinforcement and Punishment are Distinguished by the way Positive and Negative Forces are Applied

Positive Reinforcement:

"You've cleaned your room... good... here's

the keys to the car".

Negative Reinforcement:

"I'll stop hassling you if you clean this room"

Withdrawing a Positive Reinforcement:

"Your room is still filthy, so you can't use the car".

Punishment Fights a Losing Battle:

The use of the car doesn't become less attractive... its power to stimulate is simply squelched

<u>Behavioral Analysis</u>

Behavior is most effectively modified by managing and modifying desires through reinforcement

Adequate compensation and recognition of accomplishments are great reinforcements

Incentive programs

Task-related Bonuses

<u>Behavioral Analysis</u>

Behaviorism is an alternative to punishment in that it points to an alternative... modifying the circumstances surrounding the act

Employee Experiencing Financial Problems

- Credit counseling
- Pay advances
- Low interest loans

Behaviorism is an alternative to punishment in that it points to an alternative... modifying the circumstances surrounding the act

<u>Driving the Undesirable Behavior Into</u> <u>Extinction (Internal Controls)</u>

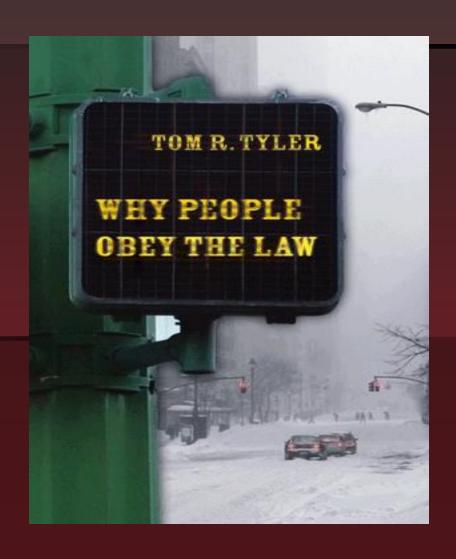

- Dual Signatures
- Perception of Controls in Place

Behaviorism is an alternative to punishment in that it points to an alternative... modifying the circumstances surrounding the act

Encourage a Behavior's OPPOSITE Response

- Fraud involves dishonesty, secretiveness, and antagonism
- Find a way to reward honesty, openness, and cooperation

Why People Obey the Law

Why People Obey the Law

Instrumental Perspective:

Because they fear punishment

Weigh the pros and cons of compliance and then act accordingly

Why People Obey the Law

Normative Perspective:

What a person believes is just and moral

Stealing is immoral, drug use is ok

Why People Obey the Law

Legitimacy:

Leadership should produce compliance with a leader's decision

Crime Causation

Crime Causation

Classical Criminology

We do things in order to avoid pain and produce pleasure

We have free will

Criminals measure whether the gains are greater than the losses

Crime Causation

Routine Activities Theory

The motivation to commit crime and the supply of offenders is constant

Availability of suitable targets (companies)

The absence of capable guardians (auditors/security)

Motivated offenders (unhappy or financially challenged employees)

What Do We Habitually Cover Regarding Internal Controls?

Dual Signatures on Checks over \$500...

Reconcile the bank account monthly by someone who doesn't sign checks...

Lock the warehouse...

...But What Should We Be Covering Regarding Internal Controls?

It is a different world out there now!

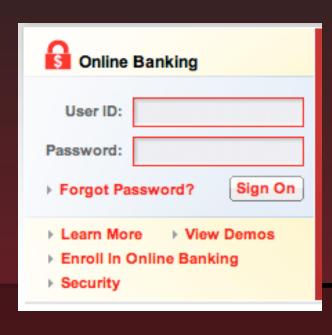

Unprecedented Access

Unprecedented Access

Online Bill Paying Services

Debit Card Usage

It is Convenient

An employee cost his company, on average, over 3,000 per month for a three year period by charging personal expenses to the company credit card. (This isn't anything new)

The monthly payment of the credit card was accomplished by signing up for paperless statements and the new "convenient pay your bill online" system.

It is Convenient

Prevention/Detection Controls:

The individual responsible for reconciling the bank account should have no signature authority on the bank account... nor online bill payment authority

It is Convenient

Prevention/Detection Controls:

In the absence of an adequate staff size, the monthly bank statements HAVE to be reviewed by someone other than the person performing these tasks.

Everybody Needs This...

Have you been to an Office Depot lately?... Home Depot?... Staples... Etc, Etc

An employee cost her company \$200,000 over a 4 year period by charging personal items to these types of accounts.

Payments on these accounts were accomplished by both paper check and online bill payment.

Nobody Looks at These

An employee cost his company over \$1,000 per month by paying for personal items through the use of the company debit card.

The bank statements: Debit card transactions are a pain to read, hard to look at...

The supporting receipt or documentation is "easy" to lose or is not maintained adequately.

Nobody Looks at These

Prevention/Detection Controls:

Assign and control daily authorized limits on debit card usage

An individual with responsibility for coding and recording transactions should have no ability to use a debit card.

Nobody Looks at These

Prevention/Detection Controls:

Consider that the debit card usage portion of the bank statement is now an INVOICE.

In the absence of an adequate staff size, the monthly bank statements HAVE to be reviewed by someone other than the person performing these tasks.

It Takes Two

An employee cost his company \$25,000 over a one year period by colluding with an outside supplier in how return credits/rebates were being applied.

The employee had a personal account with the supplier... and credits were issued into his personal account rather than the company account.

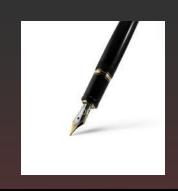

Payment to the supplier was a 50% kickback.

It Takes Two

Prevention/Detection Controls:

Inventory must be tracked and accounted for...

- Weekly, Monthly, Annually (volume determines)
- Supplier-based customer inventory tracking

The accountant for a company posted credit entries to her own accounts receivable account by debiting a different general ledger account called "Accounts Receivable – Other".

She then recorded a journal entry to credit the "Accounts Receivable – Other" and debit the "Cash in Bank" account – recorded as a false deposit

She then altered the monthly bank reconciliation to reflect a "balance per bank" that was inflated in an amount equal to the fictitious deposits

Two people in accounting

One person had "all of the control"

No segregation of duties

| | Accounts Receivable | | | | Accounts Rec | | | Checking Account | | | | | |
|-------|---|-------------|-----|-----|--------------|---------|-----|------------------|---------|--|--|--|--|

The Phantom Company

CEO caused monthly "consulting service" payments to be made to a company wholly-owned by her

No invoices were ever received, or created for that matter

All of this came through a check request

This occurred over a 10 year period and amounted to over \$870,000

The Phantom Company

Other Facts

Domineering CEO that purposefully berated employees, instilled an atmosphere of fear, and failed to insure adequate training of employees for their assigned functions

Reasonably uneducated workforce

In a "relationship" with the current chairman of the board

The Phantom Company

Controls in Place

Checks were auto-signed

Check request with supporting invoice required

The CFO of a company caused disbursements to be made to credit card companies related to his personal credit card accounts in the total amount of \$1,300,000 over a ten year period

Payments were made monthly, sometimes twice monthly, to VISA and Chase Mastercard, even though the company only had company accounts at American Express

The disbursements were recorded to "travel expense"

The CFO caused journal entries to periodically be made to credit "travel expense" and debit various other expense accounts so as to conceal any budget verses actual comparison issues

Supporting documentation included...

Credit card receipts for charges properly made to the company's American Express card

Gas pump receipts that had obviously been "left hanging" by the previous customer

Thick "card stock" junk mail flyers for educational conferences

Supporting documentation included...

Hotel bills for hotel stays 5 – 10 years in the past

Airfare reservation confirmations for air travel never taken

Documentation stapled between two pages of 8 ½ by 11 inch copy paper, sometimes with up to 100 staples

Controls in Place

Purchase requisition required

Description of the disbursement
GL Account to be charged
Individual requesting the disbursement
Signature of approval on requisition

Controls in Place

Purchase requisition, along with supporting documentation to be included with the check when presented for authorized signature

Monthly comparison of budget to actual expenses

CFO had no ability to make a journal entry into the general ledger

Out of Sight, Out of Mind

A company changed the company credit card used for business purposes from VISA to Capital One

Old VISA cards were cancelled and destroyed... except for one

An accounting clerk retained the use of one of the VISA cards and performed "cash advances" in \$300 amounts at a casino; advances totaled about \$80,000 annually over a 3 year period

Out of Sight, Out of Mind

No statements were ever received since the clerk registered the monthly statement for the "paperless" option

Payments on this card were made electronically each month by the accounting clerk

Out of Sight, Out of Mind

Controls in Place

Invoices received matched to POs

Checks not prepared without supporting invoice

Checks and invoices go to proper authority for approval

Checks not signed without all of this documentation

And so on, and so on...

Relevant Control Activities for the Day

Control Activities – Journal Entries

Journal Entry Reduction of Account Receivable

This issue speaks to the controls surrounding the ability to record journal entries. While it will more than likely remain an ability of the new accountant, the following procedures can provide a review process over these types of transactions:

- Review Monthly Journal Entries (can be performed by management, board committee, or outside third party)
- Question those entries that do not make sense and determine that all journal entries have proper supporting documentation for the business purpose

Control Activities – Accounts Receivable

Manipulation of Accounts Receivable Aging Report

The Company should implement and adhere to the following processes regarding the monthly review of this report:

- Review the full report, not just the total page
- Accept no explanations for hand-written alterations to the report
- Require supporting documentation for non-cash "credits" to accounts receivable accounts and review for the existence of this documentation monthly (billing adjustment control)
- Compare delinquency notices mailed to the aging report and inquire as to "why" a delinquency notice was not mailed
- Formally establish that no accounts will be charged-off without formal Board of Directors approval
- Compare the Board-approved charge-off list to the accounts receivable charge-offs recorded in the general ledger

Control Activities – Bank Reconciliations

Manipulation of Bank Reconciliation

• Prove the bank reconciliation reconciling items

Compare the balance per the bank statement on the reconciliation to the actual balance per the bank statement

Trail deposits in transit listed on the reconciliation to the subsequent month's bank statement (any items clearing longer than two to three days into the future should be immediately investigated)

Trail the outstanding checks listed on the reconciliation to the clearing of the amounts in the subsequent month's bank statement (follow-up on checks that have remained outstanding for longer than 60 days)

 If possible, provide training to the secondary backup bookkeeper for the performance of the bank reconciliation and insure that this individual does not possess signature authority on the bank account

<u>Control Activities - New Vendor</u> Establishment

One of the most vulnerable areas of fraud in any business is the ability for a fictitious vendor or a "vendor not necessary to the business" to be created. The internal employee can then create invoices to the company and have the company pay the invoice. In these situations, the employee is the owner of the company or a beneficiary to the company that invoiced his/her employer for the charges.

<u>Control Activities - New Vendor</u> Establishment

These types of vendors include names that are similar to existing valid vendors or represent a variation of the names of existing valid vendors. Additionally, certain inefficiencies are present in a system that has numerous variations for the name of a valid vendor.

As an example, if a Company wanted to know the amounts disbursed to ABC Company, Inc. for a certain period, the process is made more difficult if this valid vendor is referred to in the master vendor file as ABC Company, Inc., ABC Company, ABC Co., Inc., etc. Additionally, as stated previously, ABC Co., Inc. may be a fictitious vendor established by the perpetrator of an internal fraud against the company.

Control Activities - New Vendor Establishment

In an effort to reduce the probabilities of this type of scenario occurring, proper vendor establishment procedures are placed in operation. These can and should include the following:

- Name: As shown on tax return
- Business Name: If different from above
- Name: As to be used as payee
- Phone Number:
- Address:
- Remittance address: If different from above
- Contact Person:
- Contact Email:
- W-9 Required: Taxpayer ID and Type of Business
- Disclosure of Owner Relationships to Company Personnel

<u>Control Activities - New Vendor</u> Establishment

This can be accomplished through the use of a form, questionnaire, etc. Once the information is obtained, processes need to be identified that provide validation of the information presented such as phone calls to the number provided, Google searches, State tax base searches, etc.

<u>Control Activities - New Vendor</u> Establishment

The policy and processes should include provisions for a vendor master file audit to determine that vendors listed in the vendor master file have been subjected to the provisions in the policy.
